PERFECTION IN A BOX

CANTONI®

MADE IN ITALY

2025

Cantoni has been working for years to raise the profile of make-up artist, studying their needs in the workplace and developing the mosteffective tools to support their artistic talent and technical skills.

OUR CONCEPT

We believe that to be recognized as talents in the world of beauty it is essential to enter the market in the proper way, enhancing out professionalism taking care of our image.

OUR MISSION

Our main objective is to give fashion, make-up and beauty professionals a range of indispensable and technologically advanced products, produced with great attention to detail and capable of improving performance in all types of working conditions.

To achieve this goal, Cantoni has performed constant research since 1996 and now boasts the widest and most efficient range of illuminated mirrors and workstations in the world, as well as the patent for the exclusive **I-light** lighting system.

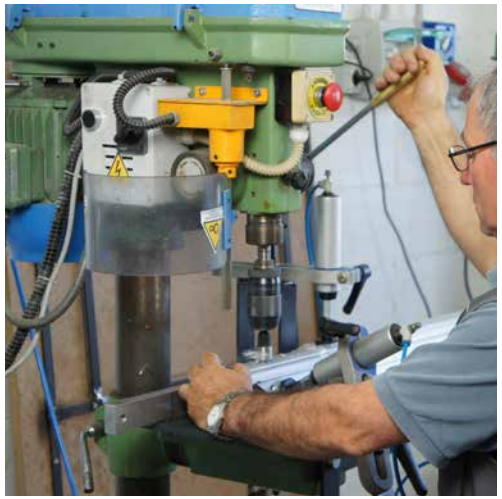

The products are designed not only for professional make-up artists, but also those who simply have a passion for make-up and colour.

UNIQUE PRODUCTS FROM A TO Z

Each product line by Cantoni follows a different manufacturing process, determined by the materials it consists of:
wood products, aluminium products, wall mirrors and plastic products in fact are manufactured using very different methods by artisans with specific expertise. Our supplier network provides us with the highest quality semi-finished products we require and only when we receive an order by the customer the product actually enters production.

Each piece can be then created with attention to every detail by our experts and customized according to customer requirements: interior spaces, type of lighting, print and logo application.

The ideas, attention to detail and passion we put into our work are the features that makes the difference between a copy and the original: a Cantoni station is actually well recognizable thanks to details, that define both functionality and design.

EXCLUSIVE PRODUCTS

A Cantoni's product is known by details,
which define its originality, aesthetic,
functionality and design

HOW A CANTONI PRODUCT IS CREATED

The first steps towards bringing the original idea to life are taken by Cantoni's technical office.

Working from a paper sketch to start with, the design is given a three-dimensional aspect using CAD 3D design, which fine tunes the functional details of the product The design then passes through the hands of expert Italian masters who work closely with Cantoni and are entrusted with the development of prototypes. The prototype is then delivered to Cantoni.

From now on, the prototype is subject to numerous and repeated tests by the various production departments: safety, stability, durability and appearance, every one of these aspects is assessed and refined, at times for years, before a version of the product is deemed ready to launch..

TOP QUALITY MANUFACTURING.

Cantoni's products are the result of a perfect balance between italian handcrafting and a cutting-edge technology

CANTONI I-LIGHT LIGHTING SYSTEM

THE ONLY LIGHTING TECHNOLOGY ENGINEERED FOR PROFESSIONAL MAKEUP ARTISTS

I-light:

. I-light Opaltech lighting lenses
. HIgh lluminous efficiency
. Dimmable light intensity
. Kelvin Gradation: 4200°
. CRI (Color Rendering Index) : Ra >= 90
. Guaranteed lenses duration 100.000/h
. 110-240V compatible
. Low electrical consumption
. Photo biological risk free
. CE certification

DON'T CALL THEM JUST "BULBS"

I-light light points consist of professional Opalt-tech lenses witha high degree of light refraction which is spread evenly and with perfect colour rendering of the light generated by the LED technology.

The **I-light**, EU patent certified by Cantoni, is the only lighting technology specifically designed for beauty professionals: the system is characterized by a neutral light emission, with no shadow areas, that does not alter the colours.
We have studied every single detail: from the distance between the light points, up to the uniformity of the emission, paying special attention to the gradation of colour, set to 4200 Kelvin degrees; we have identified the materials and the ideal solutions to ensure a long service life, low power consumption and total safety.

The light sources do not generate heat and they do not need to be removed or cooled down.

The **I-light** system, like every real design technology, is as functional as it is intuitive to use:
with only one switch the lighting system can be turn ON and OFF and it will be possible to adjust and store the brightness.

All of our workstation are equipped with the I-light system, guaranteeing a perfect lighting in any working condition.

UNIVERSAL POWER SOCKET standard EU-USA (110-240V) 16A max

DIMMER BUTTON
Variation in brightness
just hold down the power button until the ideal brightness is reached

POWER CABLE
supplied with Schuko socket
the power cable of the mobile station must be inserted into a suitable 16A - 250V socket

I-LIGHT TECHNOLOGY (patented)

The light lenses, set directly into the reflective surface, cut with high-precision instruments, diffuse light generated by I-Light technology incorporated into the structure of the mirror.

Light adjustment

No bulbs required

Input 110-240 V

Low energy consumption

CE conformity

NO blue light

TECHNICAL SPECIFICATIONS (6 light points)

Voltage: 110-240 Vac, 50/60Hz
Power : 25W MAX
Current: 106 mA MAX
Power factory: Cosφ = 0,95

The light source contained in this equipment may only be replaced by the manufacturer , its service department or equivalent qualified personnel.
Device for indoor use only , IP20
The device is designed to operate within a temperature range of 0-40°C (Ta)

LED CHARACTERISTICS:
- Brand of origin: CANTONI TRADING SRL
- Model: module Led
- Power voltage and tension: 28.3 Vdc, 0.325A
- Total nominal power: 9.2 W
- Position and purpose of the connections: on the LED module
- tc: 55 ° C
- Photobiological hazard: none

CE conformity declaration

Complies with the essential requirements of EU directives applicable to the product: Low Voltage Directive 2014/35/EU, Electromagnetic Compatibility Directive 2014/30/EU and ROHS Directive 2011/65/EU, when installed in compliance with these instructions.

ILLUMINATED WALL MIRRORS

THE WALL MIRRORS FOR FURNISHING SPACES DEDICATED TO PROFESSIONAL MAKEUP

Cantoni has combined the professional quality of the exclusive I-light lighting system (create specifically for make up artists) with large wall mirrors created with essential and simple lines.
The carefully researched distance between the light points, the perfectly neutral colour temperature of 4200 kelvin, the low energy consumption and the total absence of heat emission make them perfect for makeup, professional hairstyling in beauty salons, pharmacies, commercial spaces and makeup schools.

Cantoni's illuminated wall mirrors are divided into two ranges: **MDE and SP**

Italian handcrafted production. **Advanced machines** and **robotic procedures,** to ensure maximum accuracy

I-LIGHT TECHNOLOGY (patented)

The light lenses, set directly into the reflective surface, cut with high-precision instruments, diffuse light generated by I-Light technology incorporated into the structure of the mirror.

Each I-LIGHT module is composed of three light lenses.
Each mirror has at least six lenses, composed of two I-LIGHT modules with three light lenses each.
Up to thirty lenses can be fitted, composed of ten I-LIGHT modules with three light lenses each.

Light gradation 4200° kelvin
Guaranteed life cycle: 100,000/h
Low energy consumption
Photobiological hazard: none

Actuator:
Quick touch = on/off the light
Press and hold = brightness +/-

STRUCTURE

6060-T5 non-deformable aluminium
. 65 mm frame MH in anodized aluminium
. Made-to-measure and made-to-order products too
. Min. size 700mm
. Max. size 1850mm
. Max. 30 I-light lighting sources

MIRRORS

10 times more resistant to corrosion - 3 times more resistant to scratches compared to conventional mirrors Does not contain copper or formaldehyde and complies with the criteria set forth in the European
RoHS Directive (< 0.1% of lead)
Long-lasting in typically damp environments
Safety Film

VINTAGE CAPSULE COLLECTION

A COLLECTION OF MIRRORS FEATURING THE CLASSICAL HOLLYWOOD LIGHTING FOR THE CANTONI BRAND'S 20TH BIRTHDAY

The first Cantoni makeup stations were born 20 years ago.
To remember the first luminous mirrors engineered explicitly for the makeup artists by the brand's founders, Cantoni proposes the Vintage capsule collection, populated by mirrors with the very classical Hollywood style bulbs lighting and featuring the black colour, traditionally associated to the professional make-up sector.

The sturdy and undeformable frame of these mirrors is in black painted aluminium. The frame is bevelled at 5° toward the inside, to optimise the diffusion of the light on the reflected image.

The unmatched Cantoni quality and the ease of assembly and maintenance of these Vintage Hollywood lit mirrors make them perfect to furnish makeup schools and beauty/ hair-style salons.
Handcrafted in **Italy**

SPV12.V

Wall mirror with 9 or 12 classical lighting bulbs in the frame.

The frame is bevelled at 5° toward the inside, to optimise the diffusion of the light on the reflected image.

The mirror frame in painted black aluminium is bevelled at an angle of 5° to provide the ideal incidence of light on the mirrored figure.

SPV12.O
