AND THERE WAS LIGHT. BUT NOT ANY LIGHT

The perfect light can create suggestions and give rise to deep feelings. It's this emotional light to be the distinctive feature of Unica, a complete range of illuminated mirrors staging the full expressive force of contemporary luxury.

Each mirror resulting from the Italian craftsmanship is a unique piece combining design, technological innovation and functionality harmoniously.

Cantoni goal is to support architects, interior designers and furniture companies in the creation of astonishing and highly functional bathrooms for Luxury hotels, spa and residential facilities, thanks to mirrors subverting the usual rules and losing their role of mere furnishings in order to become structural elements of space in which the light is the absolute protagonist.

I-LIGHT: SYNTHESIS OF FUNCTIONALITY AND STYLE

The greatest ideas come from an endless passion and a patient and daily testing. That is why in Cantoni the contamination between design, research and experience has resulted in I-light technology.

I-Light is a fully-integrated lighting technology recreating the colour rendering and the reception of sunlight with absolute perfection.

Far from being a mere decorative element, the mirror becomes a highly functional tool, the key element to organize the design of the spaces destined to facial care, beauty and image.

I-light system in numbers:

- . Shade of light: 4200°kelvin degree
- . Lights life: 100.000h/min.
- . Power Consumption: 4Watt/h/ light point
- . Required bulbs: none
- . Universal Power socket: 110V-240V

MH line

I light you up

Design: **Cantoni**

The application of an aesthetic concept developed around a particular constructive curved geometry to the intrinsic strength of the aluminium gives lightness and movement to the glass. A stylistically-impeccable formal research wisely mixes elements of classicism and modernity to create refined spaces that are surprising but comfortable.

The opal lens, directly embedded into the reflecting surface and carved with high-precision instruments, spread the light created by the I-light integrated technology (Brightness 4200° K) in a thickness of only 2.55 inches (6.5 cm).

MH line

Design: **Cantoni**

Mirror with direct and indirect lighting in silvered-back float glass enclosed in an anodised aluminium frame with convex profile capable of spreading the emission of RGB backlight folding away the inner wire with a 180° range.

- . Aluminium crush-proof structure
- . IP67 side actuator for front lights
- . Safety Film
- . RF managing the RGB backlight

These objects with a refined design are real sculptures that catch the eyes and blend in anyspace, embellishing it with reflections.

- . Customised and on-demand production
- . Standard dimensions in the catalogue
- . Frame with different finishes available in:
 - brushed aluminium
 - polished aluminium
 - satin-finished aluminium

MDE line

It's amazing what the right light can do

Design: **Cantoni**

The aery surface of the mirror welcomes, in a precious setting, the curved profile of opalescent lenses, replicating with absolute perfection the chromatic shade of the sunlight.

A collection encasing, in its apparently simple lines, countless hours of study and research on the refraction of light.

MDE mirror line is successfull sythesis of functionality,advanced technology and a kind of sensual Hollywood appeal.

MDE line

Design: **Cantoni**

Wall mirror with I-light diffused lighting in silver-backed float glass with 3.5-cm (1,4 inch) silver anodised aluminium linear profile and adjustable light intensity.

- . IP67 side actuator
- . 6 or 12 front lights
- . Pre-installed rear coupling system
- . Horizontal and vertical wall version
- . Available in table version

These mirror modules with simple and essential lines, designed for directional furnishing, thanks to low power consumption, simplicity of installation and absolute absence of heat emission, create suggestive and highly-functional corners in commercial spaces, hair styling salons, pharmacies and optician's shops.

- . Customised and on-demand production
- . Standard dimensions in the catalogue
- . Side-by-side modular elements
- . Also available modules without lights

SP line

Shape, content and function

Design: **Cantoni**

The materialization of a thought combining textural geometries with ethereal transparencies: the SP line of mirrors is the point of arrival of a conceptual and sensory journey that winds through metals, reflections, lights, volumes and technology. A line that comes from a creative experience at the service of real people, objects designed for living environments and making the most of this time.

The ideal light reception on the face is guaranteed by the 5° splaying of the frames. The opal lenses diffusing the I-light light enrich with reflections the polished geometric surfaces of the frame aluminium.

SP line

Design: **Cantoni**

Wall mirror with I-light diffused illumination adjustable in intensity.

5° splayed frame in painted or chromed anodised aluminium, 5 cm (1,96 inches) thickness. Spherical opal lenses are inserted with millimetre precision in the shaped notches on the frame.

- . IP67 side actuator
- . 12 I-light front lights
- . Horizontal and vertical wall version

An amazing collection of mirrors of authentic design, where the shape, playing with transparencies and perspectives, acquires relevance and thickness in combination with an advanced technology, in order to be inserted in a functional and flexible way in real and liveable spaces.

- . Possible customised production
- . Aluminium frame available in the following versions:
 - chrome-plated
 - white glossy painted
 - black glossy painted

Our wealth is knowing how to create luxury

Design: **Cantoni**

Renowned Italian artistic craftsmanship and advanced research light meet in the long history of Cantoni, creating a collection of unique mirrors, each one representing a sculpture with its own identity and character. Result of the perfect synergy between industrial design approach, care craftsmanship and creativity, the line of illuminated mirrors with MF frame is the modern concept of luxury, in a dance moving between the icy clarity of glass and the warmth of ancient and living materials, such as wood and leather.

Size, light, style and material: each mirror is a unique and customizable piece produced by Italian craftsmen.

MF line - Argent Vague

Design: **Cantoni**

MF wall mirror with hand-decorated wood frame with silver leaf. I-light integrated lighting technology. Customised and on-demand production

- . Crush-proof inner structure
- . IP67 side actuator

Linea MF - Baroque

Design: **Cantoni**

Wall mirror with I-light that diffuses illumination with adjustable intensity. The mirror in this image, customisable as far as size and number of lights are concerned, is enclosed in a Baroque frame made of African acacia wood with gold leaf by Italian framers. Integrated light technology, side actuator.

- . Crush-proof inner structure
- . IP67 side actuator

The most intimate, personal and ephemeral paintings: these sheets of mirroring glass, illuminated by opalescent lenses, full of sunlight, return our portrait as a work of art.

- . Customised and on-demand production
- . Wooden frame in different finishes available in
 - Baroque style
 - Contemporary style
 - Classic style
