**BACKLIT FRAMES**

The 'Visual' line was conceived with the aim of making display advertising, in stores and exhibition spaces, more practical and attractive.

The "Visual" range consists of backlit frames, entirely made in Italy, equipped with the innovative image insertion **spring system**. LED back lighting, with **minimum power consumption**, gives unparalleled contrast to the **colours of the image**.

Inserting and replacing the photos into the frame is done through a simple **hand pressure**.

The anodized aluminium profile is designed in detail. No external transformer is required, unlike traditional neon/LED lighted panels: all technology of the system is contained in only **4.5 cm thick**.

The sturdy profile allows to create, even customized, special large frames, with the guarantee of a total non-deformability.

The backlit panel by Cantoni, due to its **lightness and ease** of installation, is very close to a **painting**.
